

Seminar Highlights 2019

The breakout sessions allowed attendees the opportunity to get into discussions with other stakeholders and hear about their views on certain topic. For the first time, we asked people for hot topics they'd like to have as a breakout and we received excellent proposals. Participants were able to sign up for their favorite breakout session among the following topics:

- Congresses 2030 - what will it look like
- Do codes kill creativity and way of learning?
- How will the collaboration evolve between the industry and the other stakeholders? Who will be the delegates?

After the breakouts were complete, attendees gathered in the plenary for an open feedback session.
